	Communication	Reviewed	N/A	
5.1	Facility to provide PPH with daily updates of the line list. If there is a significant change in severity of illness, number of hospitalizations, deaths, contact PPH immediately.			
5.2	Facility will advise PPH of all deaths in line listed cases. A coroner will investigate any outbreak deaths when requested by PPH.			
5.3	Facility to advise & update health care partners and other agencies that they are experiencing an outbreak.			
Comn	nents: Click or tap here to enter text.			
6.0	Signage	Reviewed	N/A	
6.1	Post outbreak notification signs at all entrances to the facility and affected area(s).			
6.2	Post notices on the door of ill resident/patient advising visitors to check in at the nursing station before entering. See section 16.0 for Visitor Control Measures.			
Comn	Comments: Click or tap here to enter text.			
7.0	Hand Hygiene	Reviewed	N/A	
7.1	Reinforce the "4 moments of hand hygiene". Clean hands with 70-90% alcohol-based hand rub, if			
	hands are not visibly dirty. Wash hands with soap and water when hands are visibly dirty.			
Comn	nents: Click or tap here to enter text.			
8.0	PPE	Reviewed	N/A	
8.1	Use PPE as per PIDAC's Routine Practices and Additional Precautions in all Health Care Settings.			
	Note: Wear a mask and eye protection to protect from splashes if a resident/patient has explosive			
	diarrhea or projectile vomiting. Staff must have completed resident/patient care & be at least a 2-			
	metre distance from resident/patient before any PPE is removed. Hand hygiene is performed as			
	PPE is put-on and removed. Housekeeping staff are included when cleaning rooms of			
	resident/patient on "Additional Precautions" as outlined above.

Page 3 of 4

	disinfectant with a DIN (effective against non-enveloped viruses such as Norovirus and Rotavirus) is being used. If Clostridium Difficile is identified, ensure the disinfectant is a sporicidal.				
10.2	If possible, dedicate equipment to ill resident/patient If equipment cannot be dedicated, disinfect shared resident/patient equipment between each use according to the manufacturer's instructions for use & PIDAC's Best Practices for Cleaning, Disinfection and Sterilization of Medical Equipment/Devices and discard disposable equipment				
Comn	nents: Click or tap here to enter text.				
11.0	Cohorting	Reviewed	N/A		
11.1	Staff and residents/patients from outbreak affected areas and non-outbreak affected areas should not mix. Minimize movement between areas as much as possible.				
Comn	mments: Click or tap here to enter text.				
12.0	Admissions and Transfers	Reviewed	N/A		
12.1	New admission to an outbreak area(s) is not recommended. Exceptions to be discussed with PPH.				
12.2	Re-admission of cases from the outbreak to an outbreak area(s) is allowed.				
12.3	Re-admission of <u>non-cases</u> to an outbreak area is generally not advised. If required, re-admission should be done in accordance with the <u>Repatriation Tool PPH.pdf</u>				
12.4	Resident/patient (case and non-case) transfers to other LTCHs/RHs are not recommended. Exceptions to be discussed with PPH.				
12.5	Outbreak facility must notify the receiving facility and other appropriate healthcare partners before transferring any resident/patient (case or non-case) from an outbreak facility/area(s).				
Comn	nents: Click or tap here to enter text.				
13.0	Absences and Leaves	Reviewed	N/A		
13.1	 Temporary leaves for residents from an outbreak affected area to a private home are acceptable. Ensure family is aware of outbreak and outbreak related symptoms. If the resident/patient becomes ill and is transferred to another facility, family should inform the facility that the resident/patient is from an OB facility. 				
13.2	Reschedule non-urgent medical appointments. Urgent appointments may continue with precautions (clean hands prior to leaving facility; transportation and receiving facility must be advised). Non-medical absences such as shopping and hair appointments should be rescheduled as much as possible.				
13.3	Well residents in non-affected areas of the home may continue their activities, including absences.				
Comn	nents: Click or tap here to enter text.				
14.0	Group Activities/Communal Dining	Reviewed	N/A		
14.1	Discontinue communal activities that mix residents/patients from different units/areas. Small group activities on individual units/areas may continue for well residents/patients. Appropriate precautions must be in place (e.g., hand hygiene).				
14.2	Discontinue communal dining that mixes residents/patients from different units/areas. Communal dining on a single unit can continue for well residents/patients				
Comn	nents: Click or tap here to enter text.				
15.0	Staff (includes students/volunteers)	Reviewed	N/A		
15.1	 Symptomatic staff must be excluded from work. Staff with COVID-19 symptoms should be excluded from working in any facility and tested for COVID-19. If COVID-19 has been ruled out and staff only have enteric symptoms, exclude ill staff from working in any facility for at least 48 hours after enteric symptoms have resolved. Encourage ill staff to submit stool specimens through their health care providers. Staff are to report illnesses to infection prevention and control (IPAC) &/or Occupational Health. 				

Page 4 of 4

15.2	Staff working in an outbreak facility/area(s) should be discouraged from working at other facilities.		
15.3	Staff should, where possible, work in either affected or unaffected areas, but not both. Staff should,		
	where possible, work with either ill or with well residents/patients but not both. If this type of		
	cohorting of staff is not possible, staff should be assigned to work first in unaffected areas or with		
	well residents/patients while adhering to strict IPAC measures.		
	nents: Click or tap here to enter text.		
16.0	Visitor Control Measures	Reviewed	N/A
16.1	Visitors should generally postpone all non-essential visits to residents/patients within the outbreak		
	area for the duration of the outbreak. Follow the facility's visitor policy.		
16.2	Symptomatic/ ill visitors should not enter the setting. If visitation must occur for essential visitors, it		
	must be determined by the OMT.		
16.3	Well essential visitors are permitted to the home and should follow IPAC measures to reduce		
	transmission.		
16.4	Visiting by outside groups (e.g., entertainers, community groups, etc.) is not permitted in the		
	outbreak area.		
16.5	Onsite adult/childcare programs may continue if it is possible to ensure there is no interaction		
	between the affected floor/unit staff or residents/patients and the participants in on-site child-care		
	1 (1)		
	or other day programs.
